Week ending April 5, 2024

The second quarter started off with positive news on the jobs front as the March non-farm payroll report came in with a gain of 303,000 jobs which was well above expectations of 205,000. Wage pressure seems to be declining as wages grew at a rate of 4.1%, which marked the slowest pace since 2021. The unemployment rate fell to 3.8%.

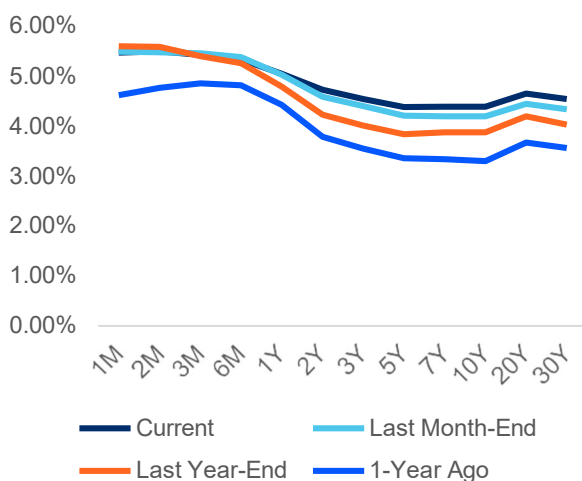

Fixed Income Markets Overview

- Following the jobs report, U.S. Treasury yields climbed higher with the 10-year yield reaching a four-month high. Signs of a strong job market are concerning investors that the Fed may further delay any rate cuts.
- As of Friday, expectations for a June rate cut fell to 50.8% from 55.2% a week earlier according to the CME FedWatch Tool.
- Other economic data during the week included a positive surprise from the ISM Manufacturing Index which rose above the key 50 threshold with a reading of 50.3. A reading above 50 indicates the metric has moved into expansionary territory. However, the ISM Services Index fell for the second month in a row to 51.4.
