Week ending September 6, 2024

Last week, the U.S. labor market was a key focus for investors, with the August nonfarm jobs report confirming signs of a weakening labor market. The unemployment rate dropped from 4.3% to 4.2%, but new jobs added showed a clear softening trend. Markets reacted to the soft jobs report with a continued sell-off, leading to a 4% decline in the S&P 500 from recent highs. The Federal Reserve's potential interest rate cuts became a focal point, with the probability of a 0.50% rate cut increasing due to the softening economic data. Treasury yields moved lower, and the yield curve un-inverted, reflecting the weaker labor market data and potential Fed rate cuts. Crude oil prices hit new lows for the year, driven by fears of a demand slowdown globally, particularly in China. Overall, markets have taken on a more defensive posture, with sectors like consumer staples and utilities outperforming amid economic uncertainty.

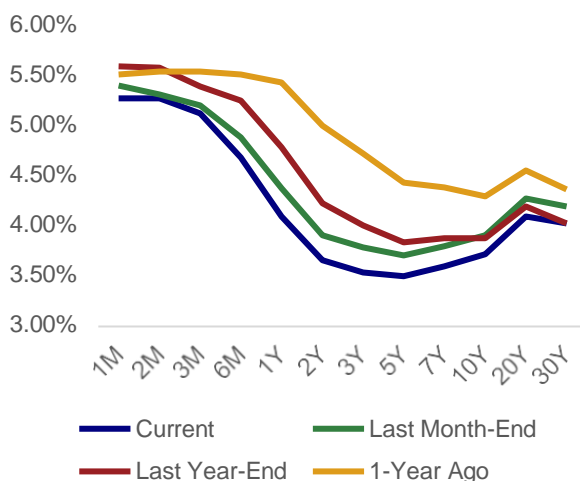

Fixed Income Markets Overview

- Treasury yields dropped across the curve to the lowest level of rates in the past year. Short-term rates (< 1 year) saw the least impact, while intermediate rates (1-5 years) saw the biggest reductions.
- The yield curve continues to un-invert as the 10-year Treasury closed the week with a higher yield than the 2-year for the first time in more than two years. Short-term rates remain high as we await the beginning of the Federal Reserve's rate cutting cycle.
- Mortgage rates were stable last week as markets awaited the release of the August jobs report. Despite rates falling over the summer, home sales have been sluggish. However, refinancing activity has ticked up as recent homeowners seek to take advantage of declining rates to lower their monthly payments.

Equity Markets Overview

- All three major domestic indices fell last week. The tech heavy Nasdaq took it the worst with a 5.8% pullback. The S&P 500 was down 4.2%, while the Dow Jones won the week only falling 2.9%. International markets, both developed and emerging, held up better than U.S. markets likely given the lesser impact of US jobs reports on their markets.
- Most sectors saw a loss for the week, with Consumer Staples and Real Estate being the only sectors to post a slight positive return of 0.6% and 0.15%, respectively. Technology and Energy were the hardest hit seeing losses of 7.1% and 5.6%. The remaining sectors all fell between 2% to 5% for the week.
- From a size perspective, large cap stocks lost 4.2% and held up slightly better than their mid- and small cap peers, which fell 4.9% and 5.2%, respectively. When looking at style performance, we saw value outperformed growth across all market caps, with the largest outperformance in the large cap space.

Alternative Markets Overview

- Oil prices fell to their lowest levels since March 2023 resulting from reduced global demand and the weaker than expected August job data suggesting a softening of the US labor market.
- Gold closed the week nearly flat after a pullback from near record highs on Friday, as the August jobs report has increased speculation the Federal Reserve may pursue a larger rate cut.
- Bitcoin continues to see its price fall off its all-time highs with an almost 10% slide for the week, which isn't surprising given the pullback in most markets. Bitcoin ETFs saw their largest daily outflows since May with more than \$287 million exiting the 11 US spot ETFs on Tuesday.

Upcoming Week

- It will be a lighter week for earnings releases as we near quarter-end but keep an eye out for reports from Dave & Buster's Entertainment and Adobe.
- While many are awaiting the outcomes of the September 17-18 Federal Reserve meeting, this week's noteworthy economic releases include inflation data, CPI (Tuesday) and PPI (Thursday), consumer data, Consumer Credit (Monday) and Consumer Sentiment (Friday), as well as the Treasury Budget and weekly unemployment claims data (Thursday).
